PROFESSIONAL SUMMARY

Full-stack Software Engineer with experience building web products from scratch to production. Technical lead of an embeddable payment gateway (Card, PIX and Boleto) and of a multi-tenant student area. Strong in Vue, Nuxt, React, Ruby on Rails and Node.js, with hands-on experience in Docker, AWS and CI/CD. About 170 pull requests in the last year, with a 97% merge rate across more than 20 repositories.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Ruby, Node.js, Python, SQL, C#

Frontend: Vue.js, Nuxt, React, Pinia, Vuex, Tailwind CSS, HTML, CSS

Backend and APIs: Ruby on Rails, Node.js, REST APIs, GraphQL, OAuth authentication

Infrastructure: Docker, AWS, CI/CD, GitHub Actions, Linux, Netlify, Vercel

Data: PostgreSQL, MySQL, SQL Server, Supabase, relational modeling, ETL pipelines

Domains: Payments (embeddable gateway, Card, PIX, recurring PIX, Boleto, refunds), multi-tenant architecture, design systems, A/B testing

Practices and tools: Code review, automated testing, Git, monorepos, agile methodologies, Claude Code

PROFESSIONAL EXPERIENCE

Qeevo Group (formerly Quero Educação) São José dos Campos, SP

Software Engineer 2025 - present

- Technical lead on building from scratch an embeddable payment gateway via iframe for partners, with Card, PIX and Boleto flows, coupons, brand theming, CI/CD and containerization (about 33 pull requests across backend and frontend).
- Technical leadership of a multi-tenant student area built from scratch: payment history, self-service refunds, PIX key validation and per-tenant localization.
- Coordinated an end-to-end refund flow across more than 6 repositories and multiple teams, with PIX refunds, automatic e-mail fallback and an audit panel.
- Enabled recurring PIX as a subscription payment method, from the monolith controller to the frontend payment modal.
- Contributed to the organization's shared design system, 74 code reviews in the period and A/B experiments on post-checkout cross-sell.

Technologies: Vue, Nuxt, TypeScript, Ruby on Rails, Node.js, Docker, AWS, PostgreSQL, CI/CD

Full-stack Developer 2024 - 2025

- Full-stack feature development on an education marketplace with multiple brands and tenants.
- Redesigned the subscription payment page layouts and implemented multi-offer post-checkout cross-sell, with cookie-based state control.

Technologies: Vue, React, Nuxt, Ruby, AWS, Docker

APTIV São José dos Campos, SP

Internal Tools Developer 2022 - 2024

- Developed internal tools and automations for industrial processes, integrating with production SQL Server databases.
- Presented a three-month internal project to leadership, with formal recognition.

Technologies: Visual Basic, C#, SQL, React, Node.js, Docker

EDUCATION

Systems Analysis and Development
Universidade do Vale do Paraíba (Univap) 03/2023 - 10/2025 | Completed

Database Technology (Technologist degree)
Fatec São José dos Campos 2022 - present

Systems Development Technician
ETEC Profª Ilza Nascimento Pintus 2019 - 2021
